

NAME

DPMSDisable - disables DPMS on the specified display

SYNOPSIS

```
cc [ flag ... ] file ... -lXext [ library ... ]  
#include <X11/extensions/dpms.h>
```

```
Status DPMSDisable ( Display *display );
```

ARGUMENTS

display

Specifies the connection to the X server

DESCRIPTION

The *DPMSDisable* function disables Display Power Management Signaling (DPMS) on the specified display. When disabled, DPMS sets the display to DPMSModeOn. If *DPMSDisable* is invoked on a display with DPMS already disabled or on a display which does not support DPMS, no change is made and no error is returned.

RETURN VALUES

TRUE The *DPMSDisable* function always returns TRUE.
