

**NAME**

FcConfigGetRescanInterval - Get config rescan interval

**SYNOPSIS**

```
#include <fontconfig/fontconfig.h>
```

```
int FcConfigGetRescanInterval (FcConfig *config);
```

**DESCRIPTION**

Returns the interval between automatic checks of the configuration (in seconds) specified in *config*. The configuration is checked during a call to FcFontList when this interval has passed since the last check. An interval setting of zero disables automatic checks. If *config* is NULL, the current configuration is used.
