

**NAME**

FcDirScan - scan a font directory without caching it

**SYNOPSIS**

```
#include <fontconfig/fontconfig.h>
```

```
FcBool FcDirScan (FcFontSet *set, FcStrSet *dirs, FcFileCache *cache, FcBlanks *blanks, const FcChar8 *dir, FcBool force)
```

**DESCRIPTION**

If *cache* is not zero or if *force* is `FcFalse`, this function currently returns `FcFalse`. Otherwise, it scans an entire directory and adds all fonts found to *set*. Any subdirectories found are added to *dirs*. Calling this function does not create any cache files. Use `FcDirCacheRead()` if caching is desired.
