

NAME

FcFontRenderPrepare - Prepare pattern for loading font file

SYNOPSIS

```
#include <fontconfig/fontconfig.h>
```

```
FcPattern * FcFontRenderPrepare (FcConfig *config, FcPattern *pat, FcPattern *font);
```

DESCRIPTION

Creates a new pattern consisting of elements of *font* not appearing in *pat*, elements of *pat* not appearing in *font* and the best matching value from *pat* for elements appearing in both. The result is passed to FcConfigSubstituteWithPat with *kind* FcMatchFont and then returned.
