

**NAME**

FcGetDefaultLangs - Get the default languages list

**SYNOPSIS**

```
#include <fontconfig/fontconfig.h>
```

```
FcStrSet * FcGetDefaultLangs (void);
```

**DESCRIPTION**

Returns a string set of the default languages according to the environment variables on the system. This function looks for them in order of FC\_LANG, LC\_ALL, LC\_CTYPE and LANG then. If there are no valid values in those environment variables, "en" will be set as fallback.
