

NAME

FcMatrixScale - Scale a matrix

SYNOPSIS

```
#include <fontconfig/fontconfig.h>
```

```
void FcMatrixScale (FcMatrix *matrix, double sx, double dy);
```

DESCRIPTION

FcMatrixScale multiplies *matrix* x values by *sx* and y values by *dy*. This is done by multiplying by the matrix:

```
  sx  0  
  0  dy
```
