

NAME

FcPatternGet - Return a value from a pattern

SYNOPSIS

```
#include <fontconfig/fontconfig.h>
```

```
FcResult FcPatternGet (FcPattern *p, const char *object, int id, FcValue *v);
```

DESCRIPTION

Returns in *v* the *id*'th value associated with the property *object*. The value returned is not a copy, but rather refers to the data stored within the pattern directly. Applications must not free this value.
