NAME

TIFFFieldDataType - get TIFF data type from field information

SYNOPSIS

#include <tiffio.h>

TIFFDataType TIFFFieldDataType(const TIFFField *fip)

DESCRIPTION

TIFFFieldDataType() returns the data type stored in a TIFF field. *fip* is a field information pointer previously returned by *TIFFFindField()*, *TIFFFieldWithTag()*, or *TIFFFieldWithName()*.

RETURN VALUES

TIFFFieldDataType() returns a member of the enum type **TIFFDataType**.
