

NAME

TIFFFieldName - get TIFF field name from field information

SYNOPSIS

```
#include <tiffio.h>
```

```
const char *TIFFFieldName(const TIFFField *fip)
```

DESCRIPTION

TIFFFieldName() returns the textual name for a TIFF field. *fip* is a field information pointer previously returned by *TIFFFindField()*, *TIFFFieldWithTag()*, or *TIFFFieldWithName()*.

RETURN VALUES

TIFFFieldName() returns a constant C string.
