NAME
    TIFFFieldTag - get TIFF field tag value from field information

SYNOPSIS

    #include <tiffio.h>

    uint32_t TIFFFieldTag(const TIFFField *fip)

DESCRIPTION
    TIFFFieldTag() returns the numeric tag value for a TIFF field. This can be compared to various constants exported by the **libtiff** header files, such as **TIFFTAG_IMAGEWIDTH**.

    fip is a field information pointer previously returned by *TIFFFindField()*, *TIFFFieldWithTag()*, or *TIFFFieldWithName()*.

RETURN VALUES
    TIFFFieldTag() returns an integer tag value.
