

NAME

XtToolkitThreadInitialize - initialize the toolkit for multiple threads

SYNTAX

```
#include <X11/Intrinsic.h>
```

```
Boolean XtToolkitThreadInitialize(void);
```

DESCRIPTION

If **XtToolkitThreadInitialize** was previously called, it returns. The application programmer must ensure that two or more threads do not simultaneously attempt to call **XtToolkitThreadInitialize**; the effect of this is undefined. **XtToolkitThreadInitialize** returns **True** if the host operating system has threads and the Ininsics are thread safe.
