

NAME

Caja - The MATE File Manager

SYNOPSIS

caja [**OPTIONS...**] [**URI...**]

DESCRIPTION

Caja is the default file manager for the MATE Desktop Environment. It makes it easy to manage, manipulate, and customize files and directories. Caja can access local and remote filesystems such as SSH, FTP, and WebDav (HTTP/HTTPS).

Caja also provides the desktop background and the icons it uses for launching links and applications, as well as accessing files, directories, the trash, and removable media like CD/DVD/BD and USB drives.

This manual page briefly documents the **caja** command.

OPTIONS**--browser**

Open a browser window.

-c, --check

Perform a quick set of self-check tests.

--display=DISPLAY

X display to use.

-g, --geometry=GEOMETRY

Create the initial window with the given geometry.

-t, --tabs

Open URIs in tabs.

-n, --no-default-window

Only create windows for explicitly specified URIs.

--no-desktop

Do not manage the desktop (ignore the preference set in the preferences dialog).

--force-desktop

Manage the desktop regardless of set preferences or environment (on new startup only)

-q, --quit

Quit Caja.

--version

Print current version information and exit.

-, -h, --help

Print standard command line options.

--help-all

Print all command line options.

This program also accepts the standard GTK options.

EXAMPLES

caja ftp://ftp.kernel.org/

Open a new Caja window on the Linux Kernel ftp server.

caja --no-desktop /home/user/

Open a Caja window in "user's" home directory without managing the desktop.

caja -g 600x400

Open a Caja window that is 600 pixels wide by 400 pixels high.

BUGS

Should you encounter any bugs, they may be reported at:

<https://github.com/mate-desktop/caja/issues>

AUTHORS

This Man Page has been updated/re-written for the MATE Desktop Environment by:

Adam Erdman <hekel@archlinux.info> (2014)

HISTORY

This manual page was originally written by Takuo KITAME <kitame@debian.org> and Dafydd Harries <daf@muse.19inch.net> to accompany the Nautilus file manager for the GNOME Desktop Environment on Debian GNU/Linux. (2004)

SEE ALSO

Caja documentation can be found from the "Help" menu, or by pressing the F1 key.
