NAME

ck-launch-session - Utility to start a ConsoleKit session from a shell script

SYNOPSIS

ck-launch-session *command*

DESCRIPTION

ck-launch-session is a utility for starting a command in its own ConsoleKit session, however the command is optional. If not specified it launches a shell.. This would be useful if a user wanted to start their own session via a **startx** script and have it registered with ConsoleKit, for example.

OPERANDS

The following operands are supported:

command

Start the specified *command* in its own ConsoleKit session.

EXAMPLES

Example 1: Launch the startx command in its own ConsoleKit session

example% **ck-launch-session startx**

SEE ALSO

ck-history(1), **ck-list-sessions**(1), **console-kit-daemon**(1m)
