NAME

    clear_locks - clear locks held on behalf of an NFS client

SYNOPSIS

    clear_locks *hostname*

DESCRIPTION

    The **clear_locks** command can be used to clear file locks held by an NFS client. This should only be used to handle problems caused by an NFS client crashing while holding locks and failing to clear them itself when it reboots.

SEE ALSO

    rpc.lockd(8)

HISTORY

    A version of **clear_locks** appeared in SunOS 4.
