NAME

    cuda - Apple CUDA I/O Controller Driver

SYNOPSIS

    To compile this driver into the kernel, place the following lines in your kernel configuration file:

        device adb
        device cuda

DESCRIPTION

    The **cuda** driver provides support for the CUDA VIA (Versatile Interface Attachment) chip found in pre-Core99 Apple hardware, such as the Power Macintosh G3.

    The Apple CUDA controller is a multi-purpose ASIC that provides power control and an adb(4) interface.

HARDWARE

    Chips supported by the **cuda** driver include:

        ⊕   Apple CUDA I/O Controller

SEE ALSO

    adb(4)

HISTORY

    The **cuda** device driver appeared in NetBSD 4.0, and then in FreeBSD 8.0.

AUTHORS

    The **cuda** driver was written by Michael Lorenz *<macallan@NetBSD.org>* and ported to FreeBSD by Nathan Whitehorn *<nwhitehorn@FreeBSD.org>*.
