

**NAME**

**dcons\_crom** - Configuration ROM stub for dcons(4)

**SYNOPSIS**

**device dcons\_crom**

**device dcons**

**device firewire**

**DESCRIPTION**

The **dcons\_crom** exposes the buffer address of dcons(4) through the Configuration ROM of firewire(4). This address is supposed to be used by dconschat(8).

**SEE ALSO**

dcons(4), firewire(4), fwohci(4), dconschat(8), fwcontrol(8)

**AUTHORS**

Hidetoshi Shimokawa <*simokawa@FreeBSD.org*>

**BUGS**

If you load *dcons\_crom.ko* manually after the system is booted, you may have to initiate a bus reset using "**fwcontrol -r**" to update the Configuration ROM.
