

NAME

devclass_get_maxunit - find the maximum unit number in the class

SYNOPSIS

```
#include <sys/param.h>
```

```
#include <sys/bus.h>
```

int

```
devclass_get_maxunit(devclass_t dc);
```

DESCRIPTION

Returns the next unit number to be allocated to device instances in the devclass. This is one greater than the highest currently allocated unit.

RETURN VALUES

The **devclass_get_maxunit()** function returns -1 if *dc* is NULL, otherwise it returns the next unit number in *dc*'s devclass.

ERRORS

None.

SEE ALSO

devclass(9), device(9)

This manual page was written by Doug Rabson.

BUGS

The name is confusing since it is one greater than the maximum unit.
