

NAME

devclass_get_softc - translate unit number to driver private structure

SYNOPSIS

```
#include <sys/param.h>
```

```
#include <sys/bus.h>
```

```
void *
```

```
devclass_get_softc(devclass_t dc, int unit);
```

DESCRIPTION

This function retrieves the driver private instance variables for the device with the given unit number and returns it.

RETURN VALUES

If the device exists, its driver-private variables are returned, otherwise NULL is returned.
