

NAME

devctl_safe_quote_sb - Insert a string, properly quoted, into a sbuf

SYNOPSIS

```
#include <sys/devctl.h>
```

```
#include <sys/sbuf.h>
```

void

```
devctl_safe_quote_sb(struct sbuf *sb, const char *src);
```

DESCRIPTION

Copy the string from *src* into *sb*. All backslash characters are doubled. All double quote characters "" are also preceded by a backslash. All other characters are copied without modification. The devctl(4) protocol requires quoted string to be quoted thus. This routine centralizes this knowledge.
