

NAME

device_delete_child - delete a child from a device

SYNOPSIS

```
#include <sys/param.h>
```

```
#include <sys/bus.h>
```

int

```
device_delete_child(device_t dev, device_t child);
```

DESCRIPTION

The specified device is removed from *dev* and deleted. If the device is currently attached, it is first detached (see `DEVICE_ATTACH(9)` and `DEVICE_DETACH(9)`).

RETURN VALUES

Zero is returned on success, otherwise an error is returned.

SEE ALSO

`device_add_child(9)`
