

NAME

device_get_devclass - access the devclass of a device

SYNOPSIS

```
#include <sys/param.h>
```

```
#include <sys/bus.h>
```

```
devclass_t
```

```
device_get_devclass(device_t dev);
```

DESCRIPTION

The current devclass associated with the device is returned. If the device has no devclass, NULL is returned.

SEE ALSO

devclass(9), device(9)
