

NAME

device_get_driver - access the current driver of a device

SYNOPSIS

```
#include <sys/param.h>
```

```
#include <sys/bus.h>
```

```
driver_t *
```

```
device_get_driver(device_t dev);
```

DESCRIPTION

The current driver associated with the device is returned. If the device has no driver, NULL is returned.

SEE ALSO

device(9), driver(9)
