

NAME

device_set_flags, **device_get_flags** - manipulate driver flags

SYNOPSIS

```
#include <sys/param.h>
```

```
#include <sys/bus.h>
```

void

```
device_set_flags(device_t dev, uint32_t flags);
```

uint32_t

```
device_get_flags(device_t dev);
```

DESCRIPTION

Each device supports a set of driver-dependent flags which are often used to control device behaviour.

These flags are read by calling **device_get_flags**() and written by calling **device_set_flags**().
