

**NAME**

`djvmcmt` - Convert multi-page DjVu documents.

**SYNOPSIS****Creating a bundled document:**

`djvmcmt -b[undled] docin.djvu docout.djvu`

**Creating an indirect document:**

`djvmcmt -i[ndirect] docin.djvu dir index.djvu`

**DESCRIPTION**

This program converts any multi-page DjVu document to either the bundled or indirect multi-page format. The input file *docin.djvu* must be either the file name of a bundled document or the index file of an indirect document.

**OPTIONS****-b[undled]**

Create a bundled multi-page DjVu document named *docout.djvu*.

**-i[ndirect]**

Create an indirect multi-page DjVu document. All the files composing the indirect document will be stored into directory *dir*. The index file will be named *index.djvu*.

**CREDITS**

This program was initially written by Andrei Erofeev <andrew\_erofeev@yahoo.com> and was improved by Bill Riemers <docbill@sourceforge.net> and many others.
