

NAME

`djvmcvt` - Convert multi-page DjVu documents.

SYNOPSIS**Creating a bundled document:**

`djvmcvt -b[undled] docin.djvu docout.djvu`

Creating an indirect document:

`djvmcvt -i[ndirect] docin.djvu dir index.djvu`

DESCRIPTION

This program converts any multi-page DjVu document to either the bundled or indirect multi-page format. The input file *docin.djvu* must be either the file name of a bundled document or the index file of an indirect document.

OPTIONS**-b[undled]**

Create a bundled multi-page DjVu document named *docout.djvu*.

-i[ndirect]

Create an indirect multi-page DjVu document. All the files composing the indirect document will be stored into directory *dir*. The index file will be named *index.djvu*.

CREDITS

This program was initially written by Andrei Erofeev <andrew_erofeev@yahoo.com> and was improved by Bill Riemers <docbill@sourceforge.net> and many others.
