

NAME

dwarf_errmsg - retrieve a human-readable string corresponding to a *Dwarf_Error* instance

LIBRARY

DWARF Access Library (libdwarf, -ldwarf)

SYNOPSIS

```
#include <libdwarf.h>
```

```
const char *
```

```
dwarf_errmsg(Dwarf_Error err);
```

DESCRIPTION

Function **dwarf_errmsg()** returns a NUL-terminated string for the error denoted by argument *err*.

Argument *err* should be a valid handle to a *Dwarf_Error* instance.

Memory Management

The returned pointer should not be freed using `free(3)` or `dwarf_dealloc(3)`.

RETURN VALUES

Function **dwarf_errmsg()** returns a pointer to a NUL-terminated string.

SEE ALSO

`dwarf(3)`, `dwarf_errno(3)`
