

NAME

false - return false value

SYNOPSIS

false

DESCRIPTION

The **false** utility always returns with a non-zero exit code.

Some shells may provide a builtin **false** command which is identical to this utility. Consult the builtin(1) manual page.

SEE ALSO

builtin(1), csh(1), sh(1), true(1)

STANDARDS

The **false** utility is expected to be IEEE Std 1003.2 ("POSIX.2") compatible.
