NAME

g-ir-doc-tool - Documentation builder

SYNOPSIS

g-ir-doc-tool [OPTION...] GIRFILE

DESCRIPTION

g-ir-doc-tool builds library documentation directly from .gir files. The output is adjusted according to which programming language you're generating docs for.

OPTIONS

--help

Show help options

--output=_DIRECTORY_

Save the resulting output in DIRECTORY.

--format=_FORMAT_

Output format. One of devdocs, mallard or sections.

--language=_LANGUAGE_

Output language. One of c, python, or gjs.

--add-include-path=_DIRECTORY_

Adds a directory which will be used to find includes inside the GIR format.

--version

Show program's version number and exit

--write-sections-file

Backwards-compatible equivalent to -f sections.
