

**NAME**

glade-previewer - Preview glade user interface definitions

**SYNOPSIS**

**glade-previewer** [OPTION...]

**DESCRIPTION**

**glade-previewer** is a tool that can load and display a User Interface that has been defined with glade. glade itself uses glade-previewer, but it can also be used as a standalone utility.

**OPTIONS**

The following options can be specified:

**-f FILENAME, --filename=FILENAME**

Name of the file to preview.

**-t TOPLEVEL, --toplevel=TOPLEVEL**

Name of the toplevel to preview.

**-l, --listen**

Listen on standard input.

**-v, --version**

Output version information and exit.

**--display=DISPLAY**

X display to use.

One of the **--filename** or **--listen** options has to be specified.
