NAME

    gnome-session-quit - End the current GNOME session

SYNOPSIS

    gnome-session-quit [--logout|--power-off|--reboot] [--force] [--no-prompt]

DESCRIPTION

    The *gnome-session-quit* program can be used to end a GNOME session.

OPTIONS

    The following options are supported:

    --logout

        Prompt the user to confirm logout. This is the default behavior.

    --power-off

        Prompt the user to confirm system power off.

    --reboot

        Prompt the user to confirm system reboot.

    --force

        Ignore any inhibitors.

    --no-prompt

        End the session without user interaction. This only works with *--logout*.

BUGS

    If you find bugs in the *gnome-session-quit* program, please report these on https://bugzilla.gnome.org.
