NAME

    gnutls_hmac_copy - API function

SYNOPSIS

    #include <gnutls/crypto.h>

    gnutls_hmac_hd_t gnutls_hmac_copy(gnutls_hmac_hd_t *handle***);**

ARGUMENTS

    gnutls_hmac_hd_t handle

              is a **gnutls_hmac_hd_t** type

DESCRIPTION

    This function will create a copy of MAC context, containing all its current state. Copying contexts for
    MACs registered using **gnutls_crypto_register_mac()** is not supported and will always result in an
    error. In addition to that, some of the MAC implementations do not support this operation.
    Applications should check the return value and provide a proper fallback.

RETURNS

    new MAC context or NULL in case of an error.

SINCE

    3.6.9

REPORTING BUGS

    Report bugs to <bugs@gnutls.org>.
