NAME

gnutls_pcert_import_rawpk - API function

SYNOPSIS

#include <gnutls/abstract.h>

int gnutls_pcert_import_rawpk(gnutls_pcert_st * *pcert*, gnutls_pubkey_t *pubkey*, unsigned int *flags*);

ARGUMENTS

gnutls_pcert_st * pcert
> The pcert structure to import the data into.

gnutls_pubkey_t pubkey
> The raw public-key in **gnutls_pubkey_t** format to be imported

unsigned int flags
> zero for now

DESCRIPTION

This convenience function will import (i.e. convert) the given raw public key *pubkey* into a **gnutls_pcert_st** structure. The structure must be deinitialized afterwards using **gnutls_pcert_deinit**(). The given *pubkey* must not be deinitialized because it will be associated with the given *pcert* structure and will be deinitialized with it.

RETURNS

On success, **GNUTLS_E_SUCCESS** (0) is returned, otherwise a negative error value.

SINCE

3.6.6
