

NAME

gnutls_psk_server_get_username - API function

SYNOPSIS

```
#include <gnutls/gnutls.h>
```

```
const char * gnutls_psk_server_get_username(gnutls_session_t session);
```

ARGUMENTS

gnutls_session_t session
is a gnutls session

DESCRIPTION

This should only be called in case of PSK authentication and in case of a server.

The returned pointer should be considered constant (do not free) and valid for the lifetime of the session.

This function will return **NULL** if the username has embedded NULL bytes. In that case, **gnutls_psk_server_get_username2()** should be used to retrieve the username.

RETURNS

the username of the peer, or **NULL** in case of an error, or if the username has embedded NULLs.

REPORTING BUGS

Report bugs to <bugs@gnutls.org>.
