## NAME

gnutls_record_can_use_length_hiding - API function

## SYNOPSIS

**#include <gnutls/gnutls.h>**

**unsigned gnutls_record_can_use_length_hiding(gnutls_session_t** *session***);**

## ARGUMENTS

gnutls_session_t session

> is a **gnutls_session_t** type.

## DESCRIPTION

If the session supports length-hiding padding, you can invoke **gnutls_record_send_range()** to send a message whose length is hidden in the given range. If the session does not support length hiding padding, you can use the standard **gnutls_record_send()** function, or **gnutls_record_send_range()** making sure that the range is the same as the length of the message you are trying to send.

## RETURNS

true (1) if the current session supports length-hiding padding, false (0) if the current session does not.

## REPORTING BUGS

Report bugs to <bugs@gnutls.org>.
