

NAME

gnutls_record_discard_queued - API function

SYNOPSIS

```
#include <gnutls/gnutls.h>
```

```
size_t gnutls_record_discard_queued(gnutls_session_t session);
```

ARGUMENTS

gnutls_session_t session

is a **gnutls_session_t** type.

DESCRIPTION

This function discards all queued to be sent packets in a DTLS session. These are the packets queued after an interrupted **gnutls_record_send()**.

This function can only be used with transports where **send()** is an all-or-nothing operation (e.g., UDP). When partial writes are allowed this function will cause session errors.

RETURNS

The number of bytes discarded.

SINCE

3.4.0
