NAME

```
gnutls_session_set_data - API function
```

SYNOPSIS

#include <gnutls/gnutls.h>

int gnutls_session_set_data(gnutls_session_t session, const void * session_data, size_t
session_data_size);

ARGUMENTS

```
gnutls_session_t session
is a gnutls_session_t type.

const void * session_data
is a pointer to space to hold the session.

size_t session_data_size
is the session's size
```

DESCRIPTION

Sets all session parameters, in order to resume a previously established session. The session data given must be the one returned by **gnutls_session_get_data()**. This function should be called before **gnutls_handshake()**.

Keep in mind that session resuming is advisory. The server may choose not to resume the session, thus a full handshake will be performed.

RETURNS

On success, GNUTLS_E_SUCCESS (0) is returned, otherwise an error code is returned.

REPORTING BUGS

Report bugs to <bugs@gnutls.org>.
