

NAME

`gsl-config` - script to get version number and compiler flags of the installed GSL library

SYNOPSIS

gsl-config [--prefix] [--version] [--libs] [--libs-without-cblas] [--cflags]

DESCRIPTION

gsl-config is a tool that is used to configure to determine the compiler and linker flags that should be used to compile and link programs that use *GSL*. It is also used internally to the .m4 macros for GNU autoconf that are included with *GSL*.

OPTIONS

gsl-config accepts the following options:

--version Print the currently installed version of *GSL* on the standard output.

--libs Print the linker flags that are necessary to link a *GSL* program, with cblas

--libs-without-cblas

Print the linker flags that are necessary to link a *GSL* program, without cblas

--cflags Print the compiler flags that are necessary to compile a *GSL* program.

--prefix Show the *GSL* installation prefix.

SEE ALSO

gtk-config(1), **gnome-config(1)**
