

NAME

`ibnd_find_node_guid`, `ibnd_find_node_dr` - given a fabric object find the node object within it which matches the guid or directed route specified.

SYNOPSIS

```
#include <infiniband/ibnetdisc.h>
```

```
ibnd_node_t *ibnd_find_node_guid(ibnd_fabric_t *fabric, uint64_t guid)
```

```
ibnd_node_t *ibnd_find_node_dr(ibnd_fabric_t *fabric, char *dr_str)
```

DESCRIPTION

`ibnd_find_node_guid()` Given a fabric object and a guid, return the `ibnd_node_t` object with that node guid. `ibnd_find_node_dr()` Given a fabric object and a directed route, return the `ibnd_node_t` object with that directed route.

RETURN VALUE

`ibnd_find_node_guid()`, `ibnd_find_node_dr()` return NULL on failure, otherwise a valid `ibnd_node_t` object.
