

NAME

`ibnd_iter_nodes`, `ibnd_iter_nodes_type` - given a fabric object and a function iterate over the nodes in the fabric.

SYNOPSIS

```
#include <infiniband/ibnetdisc.h>
```

```
void ibnd_iter_nodes(ibnd_fabric_t *fabric, ibnd_iter_func_t func, void *user_data)
```

```
void ibnd_iter_nodes_type(ibnd_fabric_t *fabric, ibnd_iter_func_t func, ibnd_node_type_t type, void *user_data)
```

DESCRIPTION

`ibnd_iter_nodes()` Iterate through all the nodes in the fabric and call "func" on them.

`ibnd_iter_nodes_type()` The same as `ibnd_iter_nodes` except to limit the iteration to the nodes with the specified type.

RETURN VALUE

`ibnd_iter_nodes()`, `ibnd_iter_nodes_type()` NONE
