NAME
    idn2_lookup_u8 - API function

SYNOPSIS
    #include <idn2.h>

    int idn2_lookup_u8(const uint8_t * *src***, uint8_t **** *lookupname***, int** *flags***);**

ARGUMENTS
    const uint8_t * src
                    input zero-terminated UTF-8 string in Unicode NFC normalized form.

    uint8_t ** lookupname
                    newly allocated output variable with name to lookup in DNS.

    int flags   optional **idn2_flags** to modify behaviour.

DESCRIPTION
    Perform IDNA2008 lookup string conversion on domain name *src* , as described in section 5 of RFC
    5891. Note that the input string must be encoded in UTF-8 and be in Unicode NFC form.

    Pass **IDN2_NFC_INPUT** in *flags* to convert input to NFC form before further processing.
    IDN2_TRANSITIONAL and **IDN2_NONTRANSITIONAL** do already imply **IDN2_NFC_INPUT**.

    Pass **IDN2_ALABEL_ROUNDTRIP** in *flags* to convert any input A-labels to U-labels and perform
    additional testing. This is default since version 2.2. To switch this behavior off, pass
    IDN2_NO_ALABEL_ROUNDTRIP

    Pass **IDN2_TRANSITIONAL** to enable Unicode TR46 transitional processing, and
    IDN2_NONTRANSITIONAL to enable Unicode TR46 non-transitional processing.

    Multiple flags may be specified by binary or:ing them together.

    After version 2.0.3: **IDN2_USE_STD3_ASCII_RULES** disabled by default. Previously we were
    eliminating non-STD3 characters from domain strings such as _443._tcp.example.com, or IPs
    1.2.3.4/24 provided to libidn2 functions. That was an unexpected regression for applications switching
    from libidn and thus it is no longer applied by default. Use **IDN2_USE_STD3_ASCII_RULES** to
    enable that behavior again.

    After version 0.11: *lookupname* may be NULL to test lookup of *src* without allocating memory.

RETURNS

On successful conversion **IDN2_OK** is returned, if the output domain or any label would have been too long **IDN2_TOO_BIG_DOMAIN** or **IDN2_TOO_BIG_LABEL** is returned, or another error code is returned.

SINCE

0.1

REPORTING BUGS

Report bugs to <help-libidn@gnu.org>.
