

**NAME**

**inet6\_rthdr\_space, inet6\_rthdr\_init, inet6\_rthdr\_add, inet6\_rthdr\_lasthop, inet6\_rthdr\_reverse, inet6\_rthdr\_segments, inet6\_rthdr\_getaddr, inet6\_rthdr\_getflags** - IPv6 Routing Header Options Manipulation

**DESCRIPTION**

The RFC 2292 IPv6 Advanced API has been deprecated in favor of the newer, RFC 3542 APIs documented in `inet6_rth_space(3)`. On platforms that support it, currently only FreeBSD, please use the newer API to manipulate routing header options.
