

NAME

inet6_rthdr_space, inet6_rthdr_init, inet6_rthdr_add, inet6_rthdr_lasthop, inet6_rthdr_reverse, inet6_rthdr_segments, inet6_rthdr_getaddr, inet6_rthdr_getflags - IPv6 Routing Header Options Manipulation

DESCRIPTION

The RFC 2292 IPv6 Advanced API has been deprecated in favor of the newer, RFC 3542 APIs documented in `inet6_rth_space(3)`. On platforms that support it, currently only FreeBSD, please use the newer API to manipulate routing header options.
