

NAME

jabberd - jabberd startup script

SYNOPSIS

jabberd [-h] [-c *config*] [-D]

DESCRIPTION

jabberd is a script that runs the various components that make up the jabberd "server".

OPTIONS

- h Show summary of options.

- c Alternate configuration file to use. The compiled-in default is /usr/local/etc/jabberd/jabberd.cfg

- D Print debugging output. You should configure jabberd with the --enable-debug switch to enable this.
