

NAME

keylogin - decrypt and store secret key

SYNOPSIS

keylogin

DEPRECATION NOTICE

keylogin is deprecated and is not available as of FreeBSD 15.0.

DESCRIPTION

The **keylogin** utility prompts the user for their login password, and uses it to decrypt the user's secret key stored in the `publickey(5)` database. Once decrypted, the user's key is stored by the local key server process `keyserv(8)` to be used by any secure network services, such as NFS.

SEE ALSO

`chkey(1)`, `keylogout(1)`, `login(1)`, `publickey(5)`, `keyserv(8)`, `newkey(8)`
