NAME

kgetcred - get a ticket for a particular service

SYNOPSIS

kgetcred [**--canonicalize**] [**-c -cache** | **--cache=***cache*] [**-e** *enctype* | **--enctype=***enctype*]
[**--no-transit-check**] [**--version**] [**--help**] *service*

DESCRIPTION

kgetcred obtains a ticket for a service. Usually tickets for services are obtained automatically when
needed but sometimes for some odd reason you want to obtain a particular ticket or of a special type.

Supported options:

--canonicalize

requests that the KDC canonicalize the principal.

-c *cache*, **--cache=***cache*

the credential cache to use.

-e *enctype*, **--enctype=***enctype*

encryption type to use.

--no-transit-check

requests that the KDC doesn't do transit checking.

--version

--help
