

NAME

krb5_eai_to_heim_errno, **krb5_h_errno_to_heim_errno** - convert resolver error code to com_err error codes

LIBRARY

Kerberos 5 Library (libkrb5, -lkrb5)

SYNOPSIS

```
#include <krb5.h>
```

```
krb5_error_code
```

```
krb5_eai_to_heim_errno(int eai_errno, int system_error);
```

```
krb5_error_code
```

```
krb5_h_errno_to_heim_errno(int eai_errno);
```

DESCRIPTION

krb5_eai_to_heim_errno() and **krb5_h_errno_to_heim_errno**() convert `getaddrinfo(3)`, `getnameinfo(3)`, and `h_errno(3)` to `com_err` error code that are used by Heimdal, this is useful for for function returning kerberos errors and needs to communicate failures from resolver function.

SEE ALSO

`krb5(3)`, `kerberos(8)`
