

NAME

ldns-rrsig - print out the inception and expiration dates in human readable form

SYNOPSIS

ldns-rrsig *domain* [*type*]

DESCRIPTION

ldns-rrsig is used to print the expiration and inception date of a RRSIG. The first argument is a domain name. **ldns-rrsig** will query the authoritative servers for that domain to get a list of RRSIGs. It will then print out the inception and expiration dates for the RRSIG covering the SOA record.

If the second argument **type** is given the RRSIG covering that type will be shown.

AUTHOR

Written by the ldns team as an example for ldns usage.

REPORTING BUGS

Report bugs to <ldns-team@nlnetlabs.nl>.
