NAME
   libevdev - wrapper library for evdev devices

SYNOPSIS
   #include <libevdev/libevdev.h>

   int **libevdev_new_from_fd** (int fd, struct libevdev **device)

   void **libevdev_free** (struct libevdev *device)

DESCRIPTION
   libevdev is a wrapper library for evdev devices. it moves the common tasks when dealing with evdev
   devices into a library and provides a library interface to the callers, thus avoiding erroneous ioctls, etc.

   This man page is a placeholder only. The documentation for this version of **libevdev** is available at:

   http://www.freedesktop.org/software/libevdev/doc/1.9.1/

LICENSE
   libevdev is licensed under the MIT license.
