

**NAME**

libinput-analyze - analyze device data

**SYNOPSIS**

**libinput analyze** [**--help**] *<feature>* [*<args>*]

**DESCRIPTION**

The **libinput analyze** tool analyzes device data. Depending on what is to be analyzed, this tool may not create a libinput context.

This is a debugging tool only, its output may change at any time. Do not rely on the output.

This tool may need to be run as root to have access to the `/dev/input/eventX` nodes.

**OPTIONS**

**--help** Print help

**FEATURES**

Features that can be analyzed include

**libinput-analyze-buttons(1)**

analyze the button states of a recording
