

NAME

libssh2_channel_eof - check a channel's EOF status

SYNOPSIS

```
#include <libssh2.h>
```

```
int
```

```
libssh2_channel_eof(LIBSSH2_CHANNEL *channel);
```

DESCRIPTION

channel - active channel stream to set closed status on.

Check if the remote host has sent an EOF status for the selected stream.

RETURN VALUE

Returns 1 if the remote host has sent EOF, otherwise 0. Negative on failure.
